

ACCESSIBILITY STATEMENT

Royal National Children's Springboard Foundation (RNCSF) constantly updates and improves this website and, because we want to make your experience of our website as good as possible, we are committed to making it accessible and user-friendly, regardless of ability or access to technology.

Browsers we support

This website has been tested on the following browsers, in accordance with Government guidelines:

Windows: Internet Explorer 11

Edge (latest versions)

Google Chrome (latest versions)

Mozilla Firefox (latest versions)

MacOS: Safari 9 and later

iOS: Safari for iOS 9.3 and later

Android: Google Chrome (latest versions)

Samsung internet (latest versions)

Downloads

RNCSF's publications and our other downloadable materials are available as Adobe PDF files. You will need Adobe Acrobat Reader to access them and, if you need to, you can download this from the [Adobe website](#).

Forms

To make these as clear as possible, the fields in forms are clearly labelled and any errors in completed forms are flagged up before forms can be submitted.

Images

We aim to make things easier for readers by having alternative text for images within galleries which describes the contents or function of what is shown on screen.

Links

Our links are clear and designed to make sense out of context. We show links in sentences in a different colour and links open in the same window, unless otherwise stated.

Navigation aids

You can return to the homepage at any time by clicking on our logo in the top left-hand corner of the page.

The search function in the top right-hand corner of the page can be used to find specific pages.

There is a link to the [Sitemap](#) at the bottom of every page and this can also be used to find specific pages, or where you're not quite sure what you're looking for.

The top of the page shows you where you are in any given section of the website.

Text

We use fonts which are designed to be easy to read.

You may be able to change the text size using your browser settings.

We use headings and sub-headings to show the structure of a page and to make it easier for screen readers.

We only use language appropriate to the content of the text and aim to write all our text as clearly as possible.

Videos

Videos are not set to play automatically on our website.

We use YouTube to show our videos because we believe it's the most accessible way to do so, but please note that we cannot control the accessibility function of YouTube. RNCSF has no control over which other video content displays in YouTube right-hand column.

Visual design

This site uses Cascading Style Sheets (CSS) for visual layout, which means the pages are designed to be readable, being well-structured and compatible with most assistive technologies.

Help

If you have any difficulty using RNCSF's website, or if you find a problem on a particular page, please let us know by emailing admin@royalspringboard.org.uk.

This Accessibility Statement was last updated on 12 June 2024 and is kept under regular review.
